ESSAY. Write your answer in the space provided or on a separate sheet of paper.

- 60) Describe the basic functions of a command center. What kind of equipment must a command center contain?
- 61) Describe the steps the crime-scene investigation team takes during its final survey of a crime scene.
- 62) List two possible consequences of failure to protect a crime scene properly.
- 63) State which crime-scene search pattern(s) would be best utilized in each of the following situations.
 - a. One investigator must search a small classroom at a community college.
 - b. Five investigators must search a large cornfield.
 - c. Two investigators must search a walled-in Little League baseball field.
 - d. One investigator must search a small muddy backyard, looking specifically for footprint evidence.
- 64) Discuss what information, specifically about timing, can be gleaned from the state of the following searched crime scenes.

a. A young woman is found dead near the front door of her home. She had not reported to work at 8 a.m. The morning newspaper is on the kitchen table next to a clean, empty plate. The decedent is found wearing pajamas and messy hair. Burned toast is found in the toaster.

b. A backpack and empty lunchbox belonging to a missing child is found on a couch in a mobile home owned by a 47-year-old single man with no family in the area. The backpack contains blank homework assigned to the child that day in school. The search reveals action movie posters, three video-game systems, twenty-five video games, and drawers filled with candy bars.

- 60) A command center is the place where members of the investigative team receive their assignments, store their equipment, and meet to discuss aspects of the case.
 - The command center can be a center for communication between investigators at multiple crime scenes.
 - The command center must contain the basic equipment needed to photograph, sketch, process, and collect evidence.
- 61) The team makes a visual overview of all parts of the scene, takes an inventory of all evidence collected so nothing is lost or left behind, retrieves all equipment, and verifies that any threats to health or safety at the scene have been or will be dealt with properly.
- 62) Evidence may be destroyed or altered.
 - The search for the perpetrator may be hindered because investigators are misled about the true facts of the incident.
- 63) a. Line
 - b. Quadrant/zone
 - c. Grid
 - d. Spiral
- 64) a. The state of the scene suggests the young woman was killed in the morning hours before 8 a.m. while she was preparing for work. This is suggested by the pajamas, the day's paper having been brought in, and breakfast (or a portion of it) having been prepared.

b. The contents of the backpack and the *empty* lunchbox suggest the objects were placed there after the child left school, because the lunch within the lunchbox had been eaten and homework was present but not yet worked on. The presence of objects which would appeal to children are out of place in the man's mobile home and should lead to further investigation.
