74. How does emotional hijacking hinder effective interpersonal communication?

Emotional hijacking is a situation in which emotions control our behavior causing us to react without thinking. Emotional hijacking prevents you from engaging in effective interpersonal communication. It can lead to unwanted behaviors: You may misrepresent your ideas, confuse the facts, say things to others that you later regret, display frustration or anger, remain silent when you would prefer to be heard, fail to listen to others, or disengage from working relationships that are in your best interest.

75. How can individuals use mitigating information to help with self-management?

Self-management is the "ability to use awareness of your emotions to stay flexible and to direct your behavior positively." It involves the discipline to hold off on current urges to meet long-term intentions. Excellent self-managers know how to use both positive and negative emotions to meet personal and business goals. One technique self-managers use is to try to understand mitigating information or favorable explanations for why others behaved in certain ways. Accepting such explanations can help reduce the urge to act on negative emotions such as frustration or resentment.

79. Al met a potential customer outside on a cold December day to discuss plowing the man's driveway all winter. The man nodded several times and sounded enthusiastic when he promised to call Al after talking to his wife. However, Al decided that was just a brush off. The man had kept his arms folded across his chest, which Al has heard is a sign of defensiveness. How well did Al practice sight-reading? Explain using details from the scenario.

Al did not practice sight-reading very well. He should have paid more attention to the cluster of signals—the nodding head, the enthusiastic tone, and the promise to call—than to the single incongruent signal. He should also have read the signals in context, which would have told him that the man was probably crossing his arms from cold, not defensiveness.
