

CHAPTER 2: ECONOMICS AND BANKING

CHAPTER OPENER

Chapter 2 covers the fundamentals of economics — how business decisions are shaped by supply and demand and the degrees of competition.

Students will learn how:

- to interpret key economic indicators, such as the gross national product and price indexes.
- the government can step in to control business cycle swings through taxation, spending, and monetary policy.
- to understand the Federal Reserve, and how its actions influence the U.S. money supply.

DETAILED LECTURE OUTLINE

I. The Basics of Economics

A. Economics Defined

1. So what is economics?
 - a. **Economics** is the study of how individuals and businesses make decisions to best satisfy wants, needs and desires with limited resources.
 - b. There are two basic studies of economics: *microeconomics* and *macroeconomics*.
 - i. **Microeconomics** is the study of how individual businesses, households and consumers make decisions to allocate their limited resources in the exchange of goods and services.
 - ii. **Macroeconomics** is the study of the behavior of the overall economy.

B. Different Types of Economic Systems.

1. What are the different types of economic systems?
 - a. An **economy** is a system that tries to balance the available resources of a country against the wants and needs of consumers.
 - b. The world's different economies are classified into three basic economic systems: planned (or controlled) economies, market economies, and mixed economies.
 - i. In a **planned economic system**, the government plays a significant role in determining the goods and services that are provided and how they are produced and distributed.
 - a.) Under **communism**, the government makes all economic decisions and controls all the social services and many of the major resources required for the production of goods and services.
 - b.) **Socialism** provides that the government owns or controls many basic businesses and services so that profits can be distributed evenly among the people.
 - c.) Many socialist and communist countries are beginning to change their economies into free market economies through **privatization** – the conversion of government-owned production and services to privately owned, profit-seeking enterprises.
 - ii. In a **market economy**, individuals are able to make their own economic decisions.

- a.) **Capitalism** is an economic system that allows freedom of choice and encourages private ownership of resources required to make and provide goods and services.
 - b.) The production and pricing of goods and services is determined through the operation of a **market** – the mechanism by which buyers and sellers exchange goods and services.
 - iii. Most economic systems are **mixed economies**, which are a blend of market and planned economies.
- C. Business and Economics
 - 1. Why do business managers need to be concerned with economics?
 - a. Businesses need to know how much of their goods to produce or services to offer, as well as how much to charge.
 - b. They need to be aware of the potential impact that government decisions and the decisions of collective businesses can have on their individual business.

II. Determining Price: Supply and Demand

- A. Supply
 - 1. What is supply?
 - a. **Supply** refers to how much of a product or service is available.
 - b. Supply is derived from a producer's desire to maximize profits.
 - c. The **law of supply** states that the amount supplied will increase as the price increases; if the price is lower, less of the product is supplied.
 - d. A **supply curve** shows the relationship between supply and price.
- B. Demand
 - 1. What is demand?
 - a. **Demand** refers to how much people want to buy at any given time.
 - b. The amount demanded increases as price declines.
 - c. A **demand curve** illustrates the relationship between demand and price.
- C. Factors that Determine Price
 - 1. What factors determine price?
 - a. As a price increases, more product is likely to be supplied, but as the price decreases, more product is likely to be demanded by customers.
 - b. If supply exceeds demand, there is a **surplus**.
 - c. If demand exceeds supply, there is a **shortage**.
 - d. The price at which supply equals demand is the **market price** or the **equilibrium price**.
- D. Factors That Shift Supply
 - 1. What makes supply change?
 - a. **Determinants of supply** include:
 - i. Technology Changes – Technology improvements enable suppliers to produce their goods or services more efficiently and with fewer costs.
 - ii. Changes in Resource Prices – The price of resources used to produce a good or service affects the cost of production.
 - iii. Price Expectations – These reflect the producer's best guess at the *future* price of a product.
 - a.) If prices are expected to increase, the supplier may reduce supply now to supply more at a later time when prices are higher.
 - b.) If prices are expected to decrease, the supplier may attempt to deplete supplies now at the higher price.

- iv. Number of Suppliers – The supply of a good or service increases as the number of competitors increases.
 - v. Price of Substitute Goods – If there are other equally comparable substitute goods available at a lower price, this affects the supply of goods.
 - b. Changes in any of these factors shift the supply curve to the left (have a negative impact on supply) or to the right (have a positive impact on supply).
- E. Factors That Affect Demand
- 1. What factors affect demand?
 - a. **Determinants of demand** include:
 - i. Changes in Income Levels – When income levels increase, people are able to buy more products. When income levels decrease, most people buy fewer products.
 - ii. Population Changes – Increases in population create a greater demand.
 - iii. Consumer Preferences – Demand for a product can change based on what is popular at any given moment.
 - iv. Complementary Goods – Products or services that go with each other and are consumed together are considered **complementary goods**.
 - v. Substitute Goods – Goods that can be used in place of other goods are **substitute goods**.
 - b. A positive change in any of these determinants of demand shifts the demand curve to the right. A negative change shifts the demand curve to the left.

III. Degrees of Competition

- A. Monopolies
 - 1. What is a monopoly?
 - a. A **monopoly** occurs when there is only one provider of a service or good and no substitutes exist.
 - 2. Why aren't there many monopolies?
 - a. In the United States, as well as in other countries, large monopolies are rarely allowed.
 - b. Without competition, the monopoly supplier can charge a higher price and may be less responsive to consumer needs.
- B. Duopolies and Oligopolies
 - 1. What happens when one or two other companies enters a monopolistic market?
 - a. A **duopoly** is where only two suppliers exist, or only two firms have dominant control over a market.
 - b. An **oligopoly** is a form of competition in which only a few sellers exist and each seller has a fairly large share of the market.
- C. Monopolistic competition
 - 1. What happens when there isn't much differentiation between products?
 - a. **Monopolistic competition** occurs when there are many buyers and sellers and little differentiation between the products themselves, but there is a *perceived* difference among consumers.
- D. Perfect competition
 - 1. What happens when products are almost identical?
 - a. **Perfect competition** occurs when there are many buyers and sellers of products that are virtually identical and any seller can easily enter and exit the market.
 - b. No single supplier can influence the price.

IV. Economic Indicators

A. The Gross Domestic Product

1. How do we determine the health of an economy?
 - a. Economists primarily use three **economic indicators** to determine how well businesses are performing overall: the gross domestic product (GDP); consumer and producer price indices; and the unemployment rate
 - b. The **gross domestic product (GDP)** measures the overall market value of final goods and services produced in a country in a year.
2. What's the difference between GNP and GDP?
 - a. The **gross national product (GNP)** attributes earnings to the country where the firm was owned, not where the product was manufactured.
3. How does the GDP act as an economic indicator?
 - a. When the GDP goes up, the indication is that the economy is in a positive state. A downward-moving GDP indicates with problems with the economy because fewer goods are being produced.

B. Consumer and Producer Price Indices

1. What else is used to gauge the health of an economy?
 - a. The **consumer price index (CPI)** and **producer price index (PPI)** are used as economic indicators. They measure purchasing power and determine the rate at which consumer and wholesale prices change.
 - i. **Inflation** is a rise in the general level of prices over time.
 - ii. A decrease in the rate of inflation is **disinflation**.
 - iii. A continuous decrease in prices over time is **deflation**.
2. How are changes in the price of consumer products measured?
 - a. The CPI tracks changes in prices over time by measuring changes in prices of goods in services that consumers purchase.
 - b. The CPI measures price changes by creating a "market basket" of a specific set of goods and services that represent the average buying pattern of urban households.
3. What goods and services are included in the CPI?
 - a. The expenditure items fall into 8 major groups: housing, food and beverages, recreation, medical care, education and communication, transportation, and other goods and services (Figure 2.8).
4. Does the CPI measure the change in price of all goods?
 - a. The CPI measures the change in prices of consumer goods only.
 - b. The PPI tracks the average change in prices at the wholesale level.
 - i. It tracks the prices of goods sellers use to create products, such as raw materials, product components that require further processing, and finished goods sold to retailers.
5. Why are price indices important?
 - a. The CPI and PPI are important because they measure purchasing power and consequently trigger business decisions.

C. The Unemployment Rate

1. What other indicators are used to measure the economy?
 - a. The **unemployment rate** measures the number of workers who are at least 16 years old, are not working, and who have been trying to find a job within the past four weeks and still haven't found one.
 - b. There are different measurements of unemployment:

- i. **Frictional unemployment** measures temporary unemployment in which workers move between jobs, careers, and locations.
 - ii. **Structural unemployment** measures permanent unemployment associated when an industry changes and jobs are terminated completely.
 - iii. **Cyclical unemployment** measures unemployment caused by a lack of demand for those who want to work.
 - iv. **Seasonal unemployment** measures those out of work during the off-season.
 - 2. Why is unemployment an important economic measure?
 - a. High unemployment results in an increase in unemployment benefits and government spending on social programs.
 - b. If the unemployment drops too low, the concern is that more workers have increased buying power and spend more, causing prices to rise and increasing inflation.
- D. Productivity
 - 1. How is the productivity of the workforce measured?
 - a. **Productivity** measures the quantity of goods and services that human and physical resources can produce in a given time period.
 - 2. Why is measuring productivity important to businesses?
 - a. An increase in productivity indicates that workers are producing more goods or services in the same amount of time, resulting in lower costs and lower prices.

V. Government and the Economy

A. Economic Policies

- 1. Why does the state of the economy change?
 - a. Over time, the economy naturally goes through periodic increases and decreases, called the **business cycle**. There are four stages (Figure 2.9):
 - i. **Peak** occurs when the economy is at its most robust point.
 - ii. **Recession** is a decline in the GDP for two or more successive quarters of a year. A very severe or long recession is a **depression**.
 - iii. A **trough** occurs when the recession hits bottom and the economy begins to expand again.
 - iv. **Expansion** or **recovery** refers to the phase when the economy begins to grow after a recession or depression.
- 2. How does the government control swings in the business cycle?
 - a. To smooth out the swings in the business cycle, the government influences the economy through its fiscal policy and monetary policy.
 - b. With **fiscal policy**, the government determines the appropriate level of taxes and spending.
 - c. With **monetary policy**, the government manages the supply of money.

B. Fiscal Policy

- 1. Why does the government increase taxes to influence the economy?
 - a. Increases in taxes are used to offset rising inflation, because higher taxes translate into less consumer spending, which in turn slows down the growth of businesses and the economy.
- 2. How does government spending help stimulate the economy?
 - a. Decreasing taxes does not have the opposite effect on the economy. Instead, to stimulate the economy, the government uses another form of fiscal policy: government spending.
 - b. Government spending increases cash flow to the economy faster than decreasing taxes because it is an immediate injection of funds into the system.

C. Monetary Policy

1. What else can be done to control the economy?
 - a. The second tool to manage the economy is monetary policy.
 - b. The **Federal Reserve System (the Fed)** is the central banking system of the United States.
 - i. It includes 12 regional Federal Reserve Banks, a Board of Governors, and the **Federal Open Market Committee (FOMC)**, which sets the policies of the Fed, including monetary policy.
2. What is the money supply?
 - a. Through its monetary policy, the Fed affects the nation's **money supply** – the combined amount of money available within an economy.
 - b. There are different components to the money supply:
 - i. **M-1**: Coins and bills (**currency**), traveler's checks, and checking accounts.
 - ii. **M-2**: M-1 plus savings deposits, money market accounts and certificates of deposit.
 - iii. **M-3**: M-1, M-2 and less liquid funds such as larger CDs, money market accounts, and U.S. dollars deposited in banks outside the U.S.
3. Why is the money supply important?
 - a. Money has a direct effect on the economy because an expanding money supply may result in inflation. However, a limited money supply can result in either disinflation or deflation.
 - b. The Fed uses three tools to affect money supply: reserve requirements, short-term interest rates, and open market operations.

D. Reserve Requirements

1. What are reserve requirements?
 - a. The **reserve requirement**, determined by the Fed, is the minimum amount of money banks must hold in reserve to cover deposits.
 - b. The Fed can ease or tighten the money supply by increasing or decreasing the reserve requirement.

E. Short-Term Interest Rates

1. What is the discount rate?
 - a. When commercial banks borrow funds from the Fed, they are charged an interest rate called the **discount rate**.
 - b. The Fed has the power to increase or decrease the discount rate in its efforts to control money supply.
2. Is the discount rate the same as the Fed Funds rate?
 - a. The **Fed Funds rate** is the interest rate that banks charge other banks when they borrow funds overnight from one another.

F. Open Market Operations

1. What are open market operations?
 - a. The primary tools the Fed uses in its monetary policy is **open market operations**, buying and selling U.S. Treasury and federal agency bonds on the "open market".
 - b. When the Fed buys or sells U.S. securities, it is changing the level of monetary reserves in the banking system by adding or taking away money from the system.

NOTE: End the lecture by asking students to write down the muddiest points or main points of the lecture. This will allow you to know what might need to be reviewed during the next lecture.

SUPPLEMENTAL ACTIVITIES

Supplemental In-Class Activity

Comparing Economic Systems

Activity Overview: This activity gets students talking about how similar and different the U.S. economic system is to other systems.

Time Limit: 30 minutes

What to Do:

1. Divide the class into small groups. Ask the groups to assume they have just overheard a classmate say, “The United States is becoming more socialist every day—with all the government control.” Have each group list reasons why the statement could be true and reasons why the statement could be false. (15 minutes)
2. Reassemble the class and discuss each group’s thoughts. (15 minutes)

Don’t Forget: Remind students that a government’s level of control distinguishes capitalism from socialism. If you have foreign students in your class, you may want them to say a bit about the economic system in their native country.

Wrap-Up: Wrap up the discussion by reminding students that the U.S. economic system and a socialist system have certain similarities and many differences. For example, workers in socialist economies often work fewer hours, have longer vacations, and receive more health, education, and child-care benefits than do workers in capitalist economies. On the other hand, the federal government does control some basic services in the United States as well as various aspects of the market through agencies, such as the Food and Drug Administration (FDA) and The Federal Communication Commission (FCC).

Supplemental Homework Activity

Let’s Go Shopping!

Homework Assignment: Visit a local shopping mall or shopping area. List each store that you see and determine what degree of competition it faces in its immediate environment. For example, if there is only one store in the mall that sells shoes, that store represents a monopoly. Note those businesses with direct competitors (e.g. two jewelry stores) and show how they compete with one another.

Deliverable: A brief paper reporting on degrees of competition and the tactics stores use to compete with each other. Answers will vary, but students should recognize different levels of competition and how stores respond to competition by advertising, reducing prices, etc.

At-Home Completion Time: 1 to 2 hours.

ENHANCING THE ONLINE COURSE

Online Lecture: Define the terms “microeconomics” and “macroeconomics” and use examples to distinguish between the two disciplines. Video tape yourself giving the short “mini-lecture”. Many institutions have video cameras for your use in the library or you can use a digital camera with the help of another professor. Load the short video online (using procedures as specified by your online platform). Have your students watch the short video and do a quiz afterward.

Economics Model Search: Ask students to search the Internet to illustrate each of the boxes in Table 2.1. Require students to develop and send in a table with graphics and examples in each of the cells to illustrate the differences between the systems of economics.

Create a Model: Ask your students to use photos or other graphics to show the relationship of supply and demand. Limit the written discussion (in words) to one page to be emailed back to the discussion board. Ask the students to relate the content of their responses to current events posted on the Internet.

Price Points: Require your students to check the prices of products for 3 weeks in a row. (Suggested products: bread, eggs, chicken, tomatoes, milk, oranges, coffee, potato chips, and gasoline) What could account for the changes in price? Ask your students to report back on the findings of their “study”, to analyze the price differences, and, using the information in the text, to develop some ideas about what has caused the price differences. Students can post the reports via the discussion board.

ANSWERS TO END OF CHAPTER MATERIALS

Self Test

Multiple Choice

1. a
2. c
3. a
4. b
5. b
6. c
7. b
8. a
9. d
10. c

True/False

1. True
2. False
3. False
4. True
5. False

Critical Thinking Questions: Suggested Answers

1. Answers will vary depending on the phase of the business cycle currently underway. Although economic indicators are closely watched by many people, the driving force behind changes in these indicators is the amount of overall demand, or total spending, on products. If total spending (the demand for products) rises, then businesses will produce more products to satisfy this increase in demand. More production generates a greater demand for workers and pushes the unemployment rate down. A greater percentage of the labor force employed translates into a higher overall income level for households. This usually means that more people will be out shopping. Increased spending generates still more sales, more production, more jobs and more income to spend. This is what happens during an expansionary phase of the business cycle. On the other hand, a decrease in total spending in the national economy results in fewer business sales. Businesses respond by cutting back on production and laying off workers. Then, the unemployment rate rises. As unemployment rises, people have less income to spend. Spending and sales fall. Businesses produce less, and production falls further, generating still more unemployment and less income to spend, etc. This is what happens during a recession. Economic indicators try to forecast changes in total spending in an economy in an attempt to forecast changes in the business cycle.
2. Monopolies are situations in which there is basically a single seller of the good or service, with no close substitutes for that product. Without competition, the monopoly supplier can charge a higher price and may be less responsive to consumer needs. The NFL (National Football League) and the MLB (Major League Baseball) can be seen as “unofficial” monopolies; for instance, a jury found for a fledgling football league, the USFL, stating that the NFL had violated anti-trust laws and made itself a monopoly. Interestingly, the NFL wants to be protected from antitrust suits because it claims that teams act – in business – as a single entity.
3. Although GDP is often used to indicate the economic well-being of a country, it really measures only how much we *spend* and, therefore, *produce*. It doesn’t really indicate the *well-being* of a society or economy. It’s a subtle distinction, but critics point out the GDP includes expenditures that address some of the negative aspects of the economy, such as cleaning up the environment

after a bad oil spill, the costs associated with fighting crime, or treating illnesses associated with smoking. These expenditures increase GDP and we may be better off because of them.

On the other hand, the GDP does not include the economic activity associated with goods produced at home but not sold (i.e., cooking, gardening, crafts), the sale of used goods, or charitable donations and volunteerism. A case in point is Hurricane Katrina in 2005. Oddly enough, if we factor in the increases in the construction, equipment, service, and industrial supply industries used to rebuild New Orleans and the other regions severely damaged by the hurricane, the disaster will end up having a positive impact on the nation's GDP, even though the *well-being* of that region has been negatively impacted. In addition, we do not factor in the massive amounts of donations of money, supplies and volunteer time directed to the region. The positive impact of the volunteer efforts, the significant amounts of donations and grants attributed to Hurricane Katrina and other disasters do not show up in the GDP and do not reflect the activity of our society, since these volunteer and donated activities do not produce a final good or service to be purchased.

Since these variations are difficult to measure domestically, and to compare internationally, the current method of computing GDP is adequate — a solid economic measure.

Team Time

The Great Debate

Answers will vary. However, the point of the exercise is to help students understand the process of monetary regulation and to discuss who has a right to regulate how money flows in the U.S. economy.

Ethics and Corporate Social Responsibility

Economic Inequality

Answers will vary. However, be sure to have students consider how the type of economy in which they are currently living (capitalism) influences their answers to this question. Would students living in a planned economy, such as communism or socialism, answer the questions in the same way?

MINI CHAPTER 2: CONSTRUCTING AN EFFECTIVE BUSINESS PLAN

CHAPTER OPENER

Business plans are essential for guiding the work of organizations, acquiring funding, and attracting both employees and investors to the organization. This chapter teaches students how to write a business plan.

DETAILED LECTURE OUTLINE

I. The Purpose of a Plan

A. Introduction

1. A business plan is a written document that details a proposed or existing venture, describing the vision, current status, the markets in which it operates, and the current and projected results of a business.
2. There are three purposes to writing a business plan:
 - a. Development – Writing down your business plan solidifies and defines your intentions.
 - b. Management – A business plan should summarize how a business opportunity will translate into profits.
 - c. Communication – A business plan is often used to attract investors or obtain loans.

B. Business Plan Competitions

1. Many top business schools and colleges in the U.S. offer business plan competitions with cash prizes that range from \$10,000 to \$100,000.

C. Before the Business Plan: Finding the Right Fit

1. It is important to articulate your own personal business plan and determine if your goals and objectives match those of the business that you've imagined.

II. Components of a Business Plan

A. The Cover Sheet and Table of Contents

1. Basic company information
2. Company logo
3. Contact information
4. Month and year business plan was created
5. Name(s) of those who prepared the plan
6. Unique record number for tracking plan distribution.

B. Executive Summary

1. An **executive summary** is an abbreviated form of the entire business plan.

C. The Company and Management Team

1. Mission and vision statements
 - a. The *mission and vision statements* should spell out what the founder ultimately envisions the business to be with respect to growth, values and contributions to society.
2. Industry profile
 - a. The *industry profile* describes the context in which the business will operate.
3. Company profile and strategy

- a. The *company profile* provides details regarding how the business works and why it has a unique chance to impact the industry.
 - b. The *company strategy* summarizes the company's plans for growth and profits.
- 4. Anticipated challenges and planned responses
 - a. This section discusses potential vulnerabilities from competition, suppliers, resources, industry, or economic situations.
- 5. The management team
 - a. This section should list the members of the management team and the pertinent experience, knowledge, or creative ability that each member brings to the team.
- D. Market Analysis
 - 1. The **market analysis** section identifies who your customers are and explains how you will reach them.
 - a. The main purpose of this section is to explain the *benefits* of your product.
 - 2. This section should include an assessment of the general market and:
 - a. Market research – an analysis of the market
 - b. Assessment of the competition
- E. The Product
 - 1. Product description
 - 2. How product will be produced
 - 3. Pricing strategy
- F. Sales and Promotion
 - 1. Approaches to promoting and selling the product or service
- G. Financials
 - 1. Income statement
 - 2. Balance sheet
 - 3. Cash flow statement
 - 4. "Stress Test" – How business will perform under worst case, expected case, and best case scenarios.
- H. Appendices
 - 1. Resumes of key managers
 - 2. Pictures of product, facilities, production, etc.
 - 3. Letters of recommendations, professional references
 - 4. Published information
 - 5. Contracts and agreements, copies of patents, copyrights, trademarks
 - 6. Media, articles

NOTE: End the lecture by asking students to write down the muddiest points or main points of the lecture. This will allow you to know what might need to be reviewed during the next lecture.

SUPPLEMENTAL ACTIVITIES

Supplemental In-Class/Homework Activity 1

Venture Capitalist PowerPoint Presentation

Activity Overview: This exercise gets students to pare down a business plan into just ten slides – an "elevator speech" for venture capitalists, if you will.

Time Limit: 20-30 minutes

What to Do:

- Tell students that they are being given the opportunity to spend 10 minutes, and only 10 minutes, with a venture capitalist. In that time, they will have to present a sales pitch for their new business idea. Fortunately, the students will have the equipment they need to give a PowerPoint presentation, but the presentation can be no longer than 10 slides, maximum.
- Suggest that students construct their presentations as follows:
 - Slide 1: Contact information, such as that found on the cover sheet.
 - Slide 2: Mission statement.
 - Slide 3: Team members and key background information.
 - Slide 4: Describe the nature of the problem you address. Try not to get into how the product solves the problem on this slide. Include how dire a problem this is and solutions introduced currently by competing products.
 - Slide 5: Introduce the product and benefits.
 - Slide 6: Elaborate on how the product resolves problems introduced on slide 4, and any relevant technology/methodology used.
 - Slide 7: Present customer testimonials, product successes, positive media reactions.
 - Slide 8: Sales strategy. How do you intend on reaching the customer?
 - Slide 9: Who are your competitors? What is the market size? How do you think competitors will react to your product?
 - Slide 10: Key financial information (may need to slip in a few extra slides to handle this).
- Have students present their final plan to the class for review.

Don't Forget: Constructing a business plan, even this slide outline, is difficult for many introductory business students. Giving lots of guidance or doing this together may be helpful to create a broad understanding of what is required in planning a new business.

Wrap-Up: Have the class critique the business plans as they are presented. Ask them whether or not they would fund the project, and why. Then ask them to discuss how well each team incorporated material from the various chapters of the text into their presentation.

Supplemental In-Class/Homework Activity 2

Business Plan Review

<http://www.businessplans.org/businessplans.html>

Activity Overview: Students locate an actual business plan and critically review it.

Time Limit: 30 – 45 minutes

What to Do: Students can work alone or in groups. As homework, have students go to: <http://www.businessplans.org/businessplans.html> and look at the business plans that are presented there. Then, students should assume the role of a venture capitalist. Would they invest their money in this venture? Why or why not? What areas of the business plan help promote the business? What areas of the business plan need further refining?

Don't Forget: Note that while the business plans presented on this website are the "best of the best", investors may still not want to finance them, due to economic or other considerations. Students should be prepared to discuss the rationale behind their decisions.

Wrap-Up: After providing sufficient time for students to go through the business plan, come together to discuss student's findings. What areas of the business plan needs improvement and why? What areas of the business plan were really helpful? Why?

Supplemental Homework Activity 1

SCORE!!

Activity Overview: Students explore the SCORE website.

Time Limit: 5-20 minutes

What to Do: Ask students to visit the SCORE Web site (www.score.org) and write a brief report on how SCORE can help entrepreneurs and small business owners get started. Encourage them to click on "About SCORE" and "How Score Can Help You". Other places of interest include: "How to" articles and "business templates" and "Start-Up Business Plan", which contains a template for creating a business plan.

Don't Forget: The idea is to let students know that starting a business is within reach.

Wrap-Up: Anyone who is interested in starting a business can get help from SCORE. There are many Small Business Association offices located near most people. Help can also be found from local colleges and universities, if they have a small business development center, and from local Chambers of Commerce.

ENHANCING THE ONLINE COURSE

SBA Review: Have your students access the information at the website for the Small Business Administration at www.sba.gov. Ask your students to provide an outline on the discussion board of the major points of information required/recommended by the SBA for a business plan.

Business Plan Rally: Have your students search the Internet for at least three examples of business plans published online by companies (large, well known companies, if possible). Ask your students to “audit” the business plans by comparing them to the example in the mini-chapter. Do these plans have the comprehensive information outlined in the text? What is missing?

On a Mission: Ask your students to identify examples of Mission Statements of three Fortune 500 companies as posted online. Ask your students to comment on what is unique about the mission statements. Are your students surprised at the overall direction of these companies as stated in the mission statements? Are the stated goals (via the mission statements) commensurate with the public images of the companies? Have your students post their assessments on the discussion board.

To Market: Have your students examine the business plans of at least three companies as posted online. Ask your students to review the market analyses of the business plans. Do your students think the companies have done a good job in assessing the markets? Are the online postings lacking in detail? Is it possible that the companies have posted shorter versions of the analyses? Do the analyses seem to be comprehensive, with usable data that can be relied on to make decisions?

Financial Review: Using the same companies that the students have previously identified, have your students review the financial data included in the business plan. Ask them to audit the financial data to determine: 1) the investment the company will need for start up or to continue business; 2) outside sources for the investment; 3) outstanding expenditures or investments (such as capital projects) that are included in the business plan; 4) timeframe in which return on investment is predicted.

THE BUSINESS PLAN PROJECT: Instructor Notes

Assigning the Business Plan: An Overview

The business plan project is a great learning experience for students. Many students will enter your classroom with the dream of owning their own business. This project is often the starting point for making that dream come true. As a result, this project will have a high level of authenticity for these students. The project also serves as an exceptional assessment tool, helping you identify how well students have mastered the course material. More importantly, the business plan project stimulates higher-level thinking that a learner can take into any profession. During this assignment, students will consider the many aspects of the world of business and demonstrate an ability to “connect the dots.”

Assigning Part 1: Introduction

Assignment Overview

The first section of the business plan requires that the student generate an idea for a new business. Students will usually fall into one of two categories. The first are those students who may never have thought about starting their own business, and may be terrified at the prospect of creating this type of comprehensive document. These students often need the most help in generating an idea for their starting point. For students who need a helpful nudge, you may wish to suggest starting a business that the student finds familiar. This could be a business in which they are currently employed, for example. The familiarity will lessen their anxiety about the project, and makes the first step a positive one. The second type of student is the learner who already has a dream of owning a business. This project is especially rewarding for these students, but they still may be concerned about completing a document of this size and therefore may also appreciate some intermittent guidance.

Files to Provide Students

Because this is the first part of the business plan, provide students with a copy of the **Business Plan Student FAQs**. It is located in this chapter of the Instructor’s Manual (see following pages) as well as on www.mybizlab.com. Give students ample explanation of the project, your expectations for how it should be completed, and due dates.

For this part of the project, students will be asked to complete **Part 1: Introduction** of the **Business Plan Project Appendix**.

Estimated At-Home Completion Time

Completion time will vary based on what students bring to the class. Students who already have a business idea will have a head start on those who do not. During the early stages of the project, it’s a good idea to devote adequate classroom time for feedback.

Homework Assignment Deliverable from Students

Each business plan is a unique document, so some variance in response length is expected. For example, a student who demonstrates higher-level thinking may write 20 to 25 pages during this project, while other students may produce 10 to 15 pages. The length will also be affected by the business chosen. As a result, you may wish to designate a range of pages for this assignment rather than a set minimum length. For Part 1, expect a range of 1 to 3 pages.

Assigning Part 2: The Company and Management Team

Assignment Overview

This section is quite comprehensive and features several challenging tasks that require students to examine internal and external aspects of a business. The first task involves creating a mission statement, which includes establishing the business's position with respect to ethics and social responsibility. Next, the student is asked to describe the industry and sector in which the company operates and to outline potential opportunities and threats presented by external factors such as macroeconomic matters, technological changes, legislation, and the like. This is often quite challenging for many students because it requires them to think with a broader viewpoint. Be prepared to offer feedback and encouragement. Then, looking internally, students are asked to define the company profile and business strategy by establishing goals and then evaluating the company's strengths and weaknesses. Lastly, the student describes the key players in the organization and creates an organizational chart.

Files to Provide Students

For this part of the project, students will be asked to complete **Part 2: The Company and Management Team** of the **Business Plan Project Appendix**.

Estimated At-Home Completion Time

If done thoughtfully, this part of the plan will require a minimum of 4 to 6 hours to complete. Students may struggle with completing the industry analysis, especially identifying the external threats and opportunities. You may wish to use class time during each section to respond to questions.

Homework Assignment Deliverable from Students

The length of student response in this section will again vary depending on the complexity and size of the proposed business. For Part 2, expect a range of 4 to 6 pages.

Assigning Part 3: Marketing

Assignment Overview

This part of the project asks students to create a marketing plan, identifying their target market and their competitors, discussing their product, and explaining how they will to attract the target market. Because they use their creativity, students often enjoy completing this part of the business plan.

Files to Provide Students

For this part of the project, students will be asked to complete **Part 3: Marketing** of the **Business Plan Project Appendix**.

Estimated At-Home Completion Time

A well-constructed explanation of the Marketing section will require 3 to 5 hours. Instructor feedback will improve the quality of responses so you may wish to use class time during each section.

Homework Assignment Deliverable from Students

The length of student response will range from 4 to 6 pages, but could be as many as 8 to 10 pages.

Assigning Part 4: The Financials

Assignment Overview

In this section, students will begin to determine if their business is truly viable. The student's responses to questions about the costs of doing business will be used as a starting point for the financial reports. Remind students that all of their submitted values are *estimates*, and there is no sure-fire method for accurately measuring how a business may perform. Many students will have trouble estimating their costs. Some assistance is shown on the student template, and you may want to create a class list of resources that students would find helpful.

The business plan provides Excel templates for students to use in this section. **These Excel spreadsheet templates include built-in formulas so that calculations are automatic based on student input – the student only has to “drop in” his or her numbers. The Excel templates are located on www.mybizlab.com. If your students cannot access these Excel documents, there are free templates available through SCORE's website at www.score.org/template_gallery.html.**

The section concludes by asking students to evaluate all of the costs that are necessary to get the business off the ground. Once students are aware of those costs, they must determine how to get funding for their business.

Files to Provide Students

For this part of the project, students will be asked to complete **Part 4: The Financials** of the **Business Plan Project Appendix**.

Estimated At-Home Completion Time

A well-constructed explanation of this section will require a minimum of 4 to 6 hours. Instructor feedback is absolutely critical in this section, as most students will need some direction in gathering information that will help answer the questions related to costs.

Homework Assignment Deliverable from Students

Expect some uniformity of response length in this area, because students will be filling in their templates. Most students will complete 4 to 5 pages within this section, including the templates.

Assigning Part 5: The Finishing Touches

Assignment Overview

In this final section, students create an executive summary, summarizing the key aspects of the entire plan, which they then insert in the front of the plan. Encourage students to be concise, as an investor would look at the executive summary before reading the details of the plan. Finally, the student is expected to create a table of contents and cover sheet for the business plan.

Files to Provide Students

For this part of the project, students will be asked to complete **Part 5: The Finishing Touches** of the **Business Plan Project Appendix**.

Estimated At-Home Completion Time

Although this section asks students to restate what they have already thought through and written, it can be the most difficult part of the business plan to do right. Most students can complete this section in 1 to 3 hours, depending on their writing skills.

Homework Assignment Deliverable from Students

Expect some uniformity, as most of the work will take the form of a 1- to 2-page executive summary and 1 page each for the cover sheet and table of contents. Encourage brevity in the summary, but emphasize that this is what you'll be reading first—and it must capture your attention to entice you to read further.

Business Plan Project *Sample Syllabus*

Overview

The business plan project is divided into parts that roughly coordinate with the parts and chapters in the text. Therefore, you can assign the project in parts after students complete each section of the book. Alternatively, you may wish to assign this project as a capstone project at the end of the semester. While the project is designed to be completed individually, you might also consider grouping students together to provide additional support and to exchange ideas as they complete their projects. If this project is being assigned in an online course, it might be best to have one discussion forum dedicated to students' questions for this project, so that everyone can ask and respond to each other's questions.

Part 1: Introduction

This part of the business plan asks students to come up with an idea for their business, creating an *identity* and forming a concrete notion of what the business will do as well as to identify what makes their product or service *unique*. The first part of the plan also asks students to identify the *type of ownership* the business will take and briefly describe who the firm's *ideal customers* are.

Assign this part of the business plan after completing Chapters 1 through 6.

Suggested 12-week quarter due date: End of week four

Suggested 16-week semester due date: End of week six

Part 2: The Company and Management Team

This part of the plan first asks students to create a *mission statement* and look at how the business will interact with the community and demonstrate *social responsibility*. Students are also asked to think about *goals* of their business, to describe the *industry* in which the business will operate, and determine some *internal and external factors* affecting the business. Finally, students will examine the *organizational structure* of the business. As part of the assignment, students will also create an *organizational chart* to show the framework of the business.

Assign this part of the business plan after completing Chapters 7 through 11.

Suggested 12-week quarter due date: End of week seven

Suggested 16-week semester due date: End of week nine

Part 3: Marketing

This part of the business plan asks students to think about marketing's "Four Ps" —*product, price, place (distribution), and promotion*—and how they apply to their business. Students will list features and benefits as well as the points of difference for their product or service. After describing the product, students must connect those described features and benefits to a targeted buyer. Once the targeted buyer has been named, students will describe advertising and promotional efforts to get the buyer's attention.

Assign this part of the business plan after completing Chapters 12 through 14.

Suggested 12-week quarter due date: End of week ten

Suggested 16-week semester due date: End of week eleven

Part 4: The Financials

This part of the business plan asks students to think about their business in terms of *financial needs* and *costs*. Students are asked to decide how much of their product they expect to sell and to identify the costs of doing business. Students will complete a balance sheet and income statement for their businesses.

NOTE: To keep things simple, we have only addressed fees associated with broadband access. (There is a line in the P&L sheet for telephone/internet expense.) Depending on the business the student is planning, they can put in website development and maintenance in the “other” category or add a separate line, if necessary.

Finally, students will need to identify how much funding they will need to start up their business and to identify source(s) of that funding.

Assign this part of the business plan after completing Chapters 15 and 16.

Suggested 12-week quarter due date: End of week eleven

Suggested 16-week semester due date: End of week thirteen

Part 5: The Finishing Touches

This part of the business plan asks students to create an executive summary, table of contents, and cover sheet for their plan.

Assign this part of the business plan approximately one week before the due date.

Suggested 12-week quarter due date: End of week twelve

Suggested 16-week semester due date: End of week fifteen

Student FAQs for the Business Plan Project

1. Where do I begin?

This project will challenge you to think about all of the parts that are necessary for a business to succeed. You should start by thinking of a business that you would like to begin. Do not use a product that already exists, such as Coca-Cola, but rather choose a business that is fairly simple in concept such as an ice cream shop or a bookstore. It would be best if you also choose a business that is of interest to you. Learning comes through the process of using your own ideas. Each section of the business plan connects with the information that is discussed in class and in the textbook.

2. What should my business plan look like?

First, you will need the **Business Plan Project Appendix** found at the back of the book or online at www.mybizlab.com. Answer the questions in the order that they are shown. Note that the project includes hints that will help you answer each question.

Note that the business plan project is also fully explained in the **Student Instructions** (see following pages).

You may also use the **Sample Business Plan** as a guide (see following pages). Note that your plan does not have to look exactly like the sample, but you need to show good organizational skills.

3. What do I do with my assignment?

Your instructor will give you instructions as to how he or she would like you to submit the plan. You will most likely be given a chance to make improvements to your plan throughout the grading period.

4. How will I know if I'm doing the plan correctly?

Your instructor will provide feedback to you about your plan. Students who successfully complete the plan have these two qualities in common:

They do not procrastinate. A well-written business plan cannot be written overnight, as they require a good deal of thought and creativity.

They ask a lot of questions. If a term is used in the business plan template that confuses you, check in your textbook or ask your instructor for an explanation.

The Business Plan Project: Student Instructions

Completing Part 1: Introduction

In Chapter 5 and in the Business Plan Mini-Chapter, we discuss how the starting point for virtually every new business is a *business plan*. Business plans describe the business strategy for any new business and explain how that strategy will be implemented. One important benefit of a business plan is that in the act of preparing it, would-be entrepreneurs must develop their business idea on paper and firm up their thinking about how to launch and run their business before investing precious time and money. In this exercise, you'll get started on creating your own business plan by completing Part 1 of the Business Plan.

Exercise Background: Part 1 of the Business Plan

Before you even begin your business plan, you need to have a “great idea” for a business. This might be a business that you've already considered setting up or something you decide on now. What are some businesses that you come into contact with on a regular basis? Restaurants, childcare services, and specialty retail stores are just a few examples to consider. You may also wish to create a business connected to a talent or interest you have, such as cooking or car repair. It's important that for the purposes of the plan, you create a company from “scratch” rather than using a company that already exists. You'll learn more if you use your own ideas.

Once you have your business idea, your next step is to create an “identity” for your business. This includes determining a business name and an idea of what your business will do. It also includes identifying the type of ownership your business will take, topics we discuss in Chapters 5 and 6. The first part of the business plan also briefly looks at who your ideal customers are.

After you have completed Part 1, take a quick look through the rest of the business plan project to get a feel for the type of information you will need as you complete the plan.

Your Assignment

Step 1

To complete this assignment, go to the **Business Plan Project Appendix** in the back of your textbook or online at www.mybizlab.com. For this assignment, you will answer the questions in **Part 1** of the plan.

Step 2

Once you have the **Business Plan Project Appendix**, answer the questions in **Part 1. Introduction**. *Note: Include the question heading for each answer, so your business plan looks more professional. See the Sample Business Plan for examples. Once you have answered the questions, be sure to save your Word document – you'll be adding your answers from each following part to the same Word document to create your final Business Plan.*

Completing Part 2: The Company and Management Team

In Part 1 of the Business Plan project, you formulated the story of your business. Part 2 of the Business Plan project asks you to think about goals of your business, some internal and external factors affecting the business, as well as the organizational structure of the business.

Exercise Background: Part 2 of the Business Plan

As you learned in Chapter 7, every business sets *goals*—accomplishments that it hopes and plans to achieve, and *objectives*—the short-term targets that are designed to achieve these goals. Businesses then make decisions about what actions will help them to achieve these goals. In effect, goals and objectives

are the means by which businesses measure their success or failure. In this part of the plan, you'll define some of the goals for your business. But first, you'll be asked to articulate your company's mission statement. A mission statement spells out what you ultimately envision your business to be with respect to growth and sometimes includes a snapshot of your strategy to achieve such growth. In addition, a mission statement reflects the overall values of the company and its owners, and the company's intended contributions to society.

Part 2 of the Business Plan also asks you to analyze the internal and external factors that affect your business. These external and internal factors are the fundamental parts of a traditional SWOT analysis. As you'll recall from Chapter 7, a SWOT analysis looks at the business's *strengths*, *weaknesses*, *opportunities*, and *threats*.

To begin, you will analyze the industry in which your company will operate, and articulate the external opportunities and threats that face your company. The opportunities and threats are generally external factors that affect the business:

Sociocultural forces	Will changes in population or culture help your business?
Economic forces	Will changes in the economy help your business, or hurt it?
Technological forces	Will changes in technology help your business, or hurt it?
Competitive forces	Does your business face much competition, or very little?
Political-legal forces	Will changes in laws help your business, or hurt it?

A positive change in one of these forces is considered an *opportunity*. A change that hurts the business is considered a *threat*. Each of these forces will affect different businesses in different ways, and some of these may not apply to your business at all. In some situations, an opportunity for one business may be a threat for another.

You will also be asked to look internally, and identify the strengths and weaknesses of your business, including global, quality, and technology issues. The strengths and weaknesses are internal factors—things that the business can control. What does the business do well (what are its strengths)? What may the business NOT do so well (what are its potential weaknesses)?

Additionally, you will be asked to outline any challenges you anticipate encountering as well as the ways in which you plan to respond to those challenges. It is important to have a plan in place for those unwanted, but sometimes unavoidable, situations.

Part 2 of the plan also asks you to determine how the business is to be run. Part of this will require you to briefly describe your managers and what contribution they will bring to the organization. In addition, you will create an organizational chart to get you thinking about the different tasks needed for a successful business. You'll also examine various factors relating to operating your business.

Your Assignment

Step 1

Open the saved **Business Plan** file you began working on in Part 1. You will continue to work from the same file you started working on in Part 1.

Step 2

For the purposes of this assignment, you will answer the questions in **Part 2: The Company and Management Team**. *Note: Once you have answered the questions, be sure to save your Word document. You'll be answering additional questions in the next part.*

Completing Part 3: Marketing

So far, your business has an identity, you've described the factors that will affect your business, and you've examined your management team and how it will be organized. Part 3 of the Business Plan project asks you to consider your marketing plan.

Exercise Background: Part 3 of the Business Plan

In Part 1, you briefly described what your business will do and who your ideal customer would be. In this part of the plan, you'll describe your ideal buyer, or target market, in more detail, listing their income level, educational level, lifestyle, age, and so forth. You'll also describe your main competitors and your plans to respond to their market presence.

In addition, this part of the plan asks you to describe more fully the product you are planning to sell. Once you create a clear picture of the product, you'll describe how it will stand out in the marketplace—that is, how it will differentiate itself. This part of the project also asks you to discuss the price of your product.

Finally, you'll examine how your business will get the attention and interest of the buyer through its *promotional mix*—advertising, personal selling, sales promotions, and publicity and public relations.

This part of the business plan encourages you to be creative. Have fun! Provide as many details as you possibly can, as this reflects an understanding of your product and buyer. Marketing is all about finding a need and filling it. Does your product do this?

Your Assignment

Step 1

Open the **Business Plan** file you began working on in Parts 1 and 2.

Step 2

For the purposes of this assignment, you will answer the following questions in **Part 3: Market Analysis**.

Note: Once you have answered the questions, be sure to save your Word document. You'll be answering additional questions in the next part.

Completing Part 4: The Financials

Now that you've had fun with your marketing ideas, it's time to think about the financial needs of your business.

Exercise Background: Part 4 of the Business Plan

This part of the business plan asks you to consider the costs of doing business, such as salaries, rent, and utilities. You'll also complete the following financial statements:

- **The Balance Sheet:** The balance sheet is a foundation for financial reporting. This report identifies the valued items of the business (its *assets*) as well as the debts that it owes (its *liabilities*). This information gives the owner and potential investors a “snapshot” into the health of the business.
- **The Income Statement:** This is the focus of the financial plan. This document will show you what it takes to be profitable and successful as a business owner for your first year.

After you have identified the costs of doing business, as well as how much revenue that you expect to earn in one year, you will articulate how much you will need to get the business started, what kind of funding you will be seeking, and how you will use the funds.

Your Assignment

Step 1

Open the **Business Plan** file you began working on in Parts 1–3.

Step 2

For the purposes of this assignment, you will answer the following questions in **Part 4: The Financials**.

Note: Once you have answered the questions, be sure to save your Word document. You'll be answering additional questions in the next part.

Completing Part 5: The Finishing Touches

It's now time to add some finishing touches to your plan.

Exercise Background: Part 5 of the Business Plan

Before you turn in your plan, you need to create a cover sheet and table of contents for your plan. You'll then conclude the project by creating an *executive summary*. The purpose of the executive summary is to give the reader a quick snapshot into your proposed business. If written well, it will encourage the reader to continue to read the rest of the business plan. Although this exercise comes at the end of the project, once you're done writing it, you'll place the cover sheet, table of contents, and executive summary at the *beginning* of your completed business plan.

Your Assignment

Step 1

Open the **Business Plan** file you began working on in Parts 1–4.

Step 2

For the purposes of this assignment, you will answer the following questions, shown in **Part 5: The Finishing Touches**.

Executive Summary

The Vault Grill will be located in the town of Mainland, Pennsylvania, a city of approximately 20,000 people. The restaurant will offer a friendly casual dining atmosphere for people of all ages. We will serve a large variety of meals and desserts, but our specialty will be our grilled of fish, steaks, and burgers.

The mission of The Vault Grill is to provide a quality product at a quality price served by quality people. We will demonstrate our devotion to the community through customer service and community relations.

Our ideal customers are those who are looking for a fun and casual place to have a great and affordable meal. We will be located in the downtown area, in a renovated bank building, so we plan to cater to business men and women during the lunch hour and in the after-work hours. Additionally, since there is a small college nearby, we also expect many of our customers will be students and faculty members.

Customers will visit us for several reasons. First are our grilled entrees. They will be the main appeal for their flavor since Joe Mesland, the grill master, has several special rubs and sauces that offer a unique flavor to any meat or fish entree. Customers can select how they would like their entrée prepared by selecting a dry rub or sauce of varying spiciness. Second, we offer a fun and casual atmosphere that encourages people to relax and enjoy their time spent at the restaurant.

The Vault Grill is also part of the local history. It is located toward the end of town in the former National Bank building. The original bank offers a unique atmosphere with vaulted ceilings, marble floors, and unique windows in the upper areas. We are planning on keeping the original vault and some of the other fittings to preserve the historical nature of the building.

Our business will be a limited liability company. We have structured the business as a LLC for personal protection since we will also be serving liquor.

All partners are well qualified to run this restaurant. Steven Samulson has a degree in Hospitality Management. He has managed several successful restaurants, including Henry's Meat House and The Funky Kitchen. Roger Miller has a degree in business management, and in addition to a strong background in financial management, was recently a partner in a local steak house franchise. Joe Mesland, our grill master, was the head chef at the Cajun Grill for the last ten years and won the prestigious 2007 Silver Spoon award.

Our business will thrive for a number of reasons. First, the city of Mainland has a stable population, with a number of healthy industries and a neighboring college.

Second, the local population is upstream middle class. We believe that this segment of the population will have the desire and income to eat out on a regular basis.

Our skills and knowledge in food service, combined with our connections to the community, will make this business a sound investment.

PART 1. INTRODUCTION

BUSINESS NAME

The Vault Grill

DESCRIPTION OF BUSINESS

The Vault Grill will be located in the town of Mainland. The restaurant will offer a friendly casual dining atmosphere for people of all ages. We will serve a large variety of great meals and desserts, but our specialty will be our grilled of fish, steaks, and burgers.

FORM OF BUSINESS OWNERSHIP

The business will be a limited liability corporation with three primary partners. Each partner has special skills that they bring to the business.

IDEAL CUSTOMER

Our ideal customers are those who are looking for a fun and casual place to have a great and affordable meal. We plan to cater to business men and women during the lunch hour and in the after-work hours as well as to the students and faculty of the nearby college. We will have special promotions focused on each of these two groups that will be discussed later.

COMPANY ADVANTAGES

Our grilled entrees will define our customer's experience and persuade them to choose The Vault Grill over the other restaurant choices in the area. The main appeal of the grilled entrees is the flavor, since Joe Mesland, the grill master, has several special rubs and sauces that offer a unique taste to any meat or fish entree. Customers can select how they would like their entrée prepared by selecting a dry rub or sauce of varying spiciness. Second, we offer a fun and casual atmosphere that encourages people to relax and enjoy their time spent at the restaurant.

The Vault Grill is also part of the local history. It is located toward the end of town in the former National Bank building. The original bank offers a unique atmosphere with vaulted ceilings, marble floors, and unique windows in the upper areas. We are planning to make the original vault a visible part of the decoration and will be restructuring the original teller area as the bar. Finally, we will preserve as many of the other fittings as possible to maintain the historical nature of the building.

PART 2. THE COMPANY AND MANAGEMENT TEAM

THE MISSION STATEMENT

MISSION STATEMENT

Our company aims:

- to sell delicious and remarkable food and drinks that meet the highest standards of quality, freshness, and seasonality and that combine both modern-creative and traditional grilled styles of cooking,
- to consistently provide our customers with impeccable service by demonstrating warmth, graciousness, efficiency, knowledge, professionalism, and integrity in our work,
- to have every customer who comes through our doors leave impressed by The Vault Grill and excited to come back again,
- to create and maintain a restaurant that is comprehensive and exceptional in its attention to every detail of operation,
- to provide all who work with us a friendly, cooperative, and rewarding environment, which encourages long- term, satisfying employment, and
- to be a giving member of the Mainland community and to use our restaurant to improve the quality of life in the area.

ETHICAL ISSUES

Our integrity means more than profit; service, quality, and sanitation mean more than volume; and honesty is the basis of sales and service. Therefore, our code of ethics is as follows.

We will:

- ensure that our food and drink meet the highest standards of quality and freshness before and after they are prepared,
- ensure our pricing and performance is done with honesty and integrity,
- ensure our business practices meet the highest standards of service, quality, and sanitation, and
- ensure our employees are treated fairly at all times.

SOCIAL RESPONSIBILITY

The Vault Grill, as an integral part of the Mainland community, will donate any edible and unused foods to the local food bank and will donate meals to needy families throughout the year, especially at holidays. We recognize that our responsibility to society goes beyond food; therefore, we will also have a strong

environmental policy and recycle whatever we can, and sponsor events to promote healthy lifestyles.

INDUSTRY PROFILE

INDUSTRY DESCRIPTION

The Restaurant sector is in the Services industry. There are many types of restaurants fighting for the same potential customer base. Fast food giants, smaller take-out places, to more sophisticated high-end restaurants are all part of the Restaurant sector. Additionally, cafes, tearooms, and restaurants with ethnic themes such as Italian, Mexican, Chinese, and Thai are all potential threats to our customer base. The Vault Grill sees itself positioned in the middle—offering quality meals in a sit-down environment at an affordable price. There are very few restaurants in the local region that fall into this type of category.

OPPORTUNITIES AND THREATS

Mainland is a vibrant community that has attracted a variety of businesses, and is also the home of Newburg College. While a declining economy may deter some individuals from spending money eating out, since The Vault Grill charges reasonable prices and caters to businesses, the potential negative impact of a bad economy is reduced. The opportunity exists to expand our current customer base beyond the business and college crowd in Mainland.

In addition to economic strains, other possible threats include severe weather in areas that supply the produce, which could affect the availability or price of produce. Similarly, an issue affecting the quality or availability of meat, fish, or poultry (such as mad-cow disease and mercury in fish) is another possible threat. Non-smoking restrictions have been put in place for all restaurants in the county. Since this restriction has been made prior to our opening, we do not believe this will have any impact on our business.

COMPANY PROFILE AND STRATEGY

BUSINESS GOALS

First-year business goals:

1. To break even
2. To build a strong customer base
3. To minimize employee turnover

Intermediate to long-term business goals:

1. To begin a carry-out and catering service within three years
2. To earn net profits of \$500,000 within five years

COMPANY STRENGTHS

Foremost, we have a highly motivated management team with expertise in the restaurant business from a management and business perspective. In addition, the chef is an award-winning specialist who has been responsible for grilled food preparation for over 15 years. Our business is community-oriented and intends to ensure that we meet the dining and entertainment needs of our customers.

RAW MATERIALS AND SUPPLIES

The Vault Grill will need the following initial inventory. Prices listed reflect new equipment and furniture. We are looking for used equipment and furniture to help reduce overall costs.

15 Tables @ \$350 each	\$5,250
60 Chairs @ \$100 each	6,000
15 Barstools @ \$150 each.....	2,250
2 Cash Registers @ \$225 each.....	450
Squirrel POS System	1,500
Char-Grill Oven Unit.....	1,000
Viking 8-Burner Stove	3,500
3 Microwave Ovens @ \$150 each	450
Deep Fryer.....	2,500
Refrigeration Unit	2,000
Freezer	4,000
Ice Maker	1,000
Dishwashing Unit	2,000
3 Prep-Tables @ \$200 each.....	600
Table Linens and Napkins	500
100 Small Glasses @ \$1.00 each.....	100
100 Large Glasses @ \$1.25 each	125
60 Wine tumblers @ \$2.00 each.....	1,200
100 Sets Plates, Bowls, Mugs @\$10.00 each	1,000
100 Sets Silverware @ \$12 per set	1,200
Miscellaneous Kitchen and Bar Supplies.....	2,000
Table and Restaurant Decorations.....	1,375
Total	\$40,000

In addition to the above, we anticipate renovation costs of approximately **\$200,000** to convert the existing bank to a restaurant and kitchen facility. We will need to stock our bar with liquor, wine, and beer and our pantry with basic cooking staples such as canned products, spices, and condiments. We anticipate initial bar and food stocking costs to be approximately **\$8,000**. Most of our bread and dessert offerings will be made fresh on site. All other food items will be purchased from local

distributors on a weekly basis. Local in-season produce will be used as much as possible.

Our inventories will not be significantly affected by change in seasons or holidays.

We plan to be open from 11 a.m. to 10 p.m., Monday through Thursday, 11 a.m. to midnight Friday and Saturday. We will be closed on Sundays, Thanksgiving, Christmas, and New Years.

ANTICIPATED CHALLENGES AND PLANNED RESPONSES

ANTICIPATED CHALLENGES

We have two major anticipated challenges:

1. We must obtain sufficient funds to start the venture.
2. There is a rumored opening of a steakhouse chain restaurant in a new mall opening up just outside the Mainland border.

PLANNED RESPONSES

We plan to respond to these two major anticipated challenges as follows:

1. The three initial partners are planning to personally contribute nearly half the anticipated funds needed to start the venture. In addition, we have made contact with a restaurant that is upgrading its furnishings and equipment. We anticipate that we can purchase many of the furnishings and kitchen equipment that they are replacing, thus driving down the level of our initial funding requirements.
2. While the rumored opening of the steakhouse chain may initially hurt us, we are confident that we can win over customers with our signature grilled-preparation, customer-focused service, reasonably priced menu, and proximity to local businesses and the college.

THE MANAGEMENT TEAM

MANAGEMENT

There is one level of management in the restaurant, with three different types of managers as follows:

- Floor Manager
- Grill Manager
- Accounting Manager

All managers are also co-owners.

ORGANIZATIONAL CHART

The organizational chart for The Vault Bar and GrillCafé is quite simple given that it contains only one level of management. As the business grows, further levels of management and more employees may need to be added.

PART 3. MARKETING

MARKET ANALYSIS

MARKET RESEARCH

The Vault Grill will have two markets.

The first target market is the businessmen and women who work in Mainland and surrounding areas. These individuals are college educated, in their 30s, 40s, 50s, and 60s, middle class, and will be looking for quick, reasonably priced lunches in a nice atmosphere in which to entertain business associates and clients. We also anticipate that younger professionals in their 20s and early 30s will be looking for a fun, casual, and reasonable place to meet after work for dinner or a few drinks.

The second target market is the college community. While we do not expect that many of our regular customers will be students, we do anticipate that faculty members, administrators, parents of students, and some students on special occasions will frequent The Vault Grill. The demographics of this second target market vary quite widely but are held together by their connection to the college. The second target market will be more seasonal in nature, as the college year runs primarily from September through May.

ASSESSMENT OF THE COMPETITION

Several competitors exist in the area, ranging from the fast food giants of McDonalds and Burger King to other smaller take-out convenience places to more sophisticated high-end restaurants. There are also a handful of cafes and tearooms, and a few ethnic restaurants. The Vault Grill sees itself positioned in the middle—offering quality meals in a sit-down environment at an affordable price. There are very few restaurants in the local region that fall into this type of category. Specifically, there is the Mainland Diner, Winston's, and The Country Restaurant.

THE PRODUCT OR SERVICE

PRODUCT FEATURES AND BENEFITS

The Vault Grill's featured menu item will be its grilled entrées. Our grill master has several special rubs and sauces that offer a unique flavor to any meat or fish entrée. Customers can select how they would like their entrée prepared by selecting a dry rub or sauce of varying spiciness. For those who are not fans of grilled meat, poultry, and fish, we will offer other methods of preparation, pasta dishes, and meal-portioned salads. Another signature product will be our warm breads and creamy flavored butters placed at each table after diners are seated. We will strive to

present a total product offer that includes warm and friendly service, a delicious, reasonably priced meal, and a relaxing ambience.

PRODUCT DIFFERENTIATION

People have many choices when it comes to dining out. We know that we have to offer a product that stands out from the competition. We will have two major differences from our local competitors. The first is the grilled preparation of our food as well as the fresh, high-quality produce and bakery goods. Diners will place the highest importance on the meal itself, and so will we. However, the food is only part of the dining experience. We will pay close attention to ensure our wait staff is well trained, customer focused, clean, and friendly. The details of customer service from attire and grooming to efficiency and friendliness will constantly be monitored. Finally, since a significant part of our business will be coming from serving business lunches, we will strive to ensure our customers with time constraints receive extra quick and attentive service.

PRICING

Our pricing strategy is fairly simple. We plan to position our menu offerings and their prices to reflect our quality products but not too high to give the impression that we are a higher-end restaurant. Although we will have opening week specials, we will not pursue penetration pricing or price skimming as we do not wish to cause discontent among customers when we inevitably raise our prices to secure a profit later.

SALES AND PROMOTION

PLACE (DISTRIBUTION) ISSUES

Mainland, with its business and collegiate communities, offers the type of customer base we are seeking. We foresee no distribution issues. In the future, we hope to expand The Vault Grill services to offer catering and take-out.

ADVERTISING

Although we have two target markets, we will have primarily one advertising approach to attract both business and collegiate customers initially, but will rely on word of mouth recommendations as our best ongoing advertising strategy.

Initially, we plan to distribute brochures with sample menus to all local businesses and to college faculty and administration. These advertisements will include coupons for discounts on our lunch menu. Coupons will also allow us to track the success of the advertising.

We will also be listed in the local phone book and will have a small site on the Internet.

In opening week, we will run ads in the local newspaper and college newspaper to advertise our presence.

These ideas are fairly inexpensive ways to get our message out to our target markets.

PROMOTION

We will have several opening week and ongoing promotions.

During opening week, we will feature buy one get one free lunches and a free appetizer with purchase of two entrees after 6 pm. These specials will last only opening week and will seek to generate initial foot traffic in the restaurant.

We will also have several ongoing promotions. At lunchtime, when many customers are under pressure to return to their office within an hour, we will guarantee meals will be served within 20 minutes of ordering or customers get their lunch free.

Similarly, to entice those who might stop in for a drink after work to stay for dinner, we will be offering discounts on meals ordered prior to 6:00. Finally, for college students who might need an evening break, we will offer half-priced appetizers after 9 pm on Monday through Thursday nights.

We will also have promotions during the fall, when Mainland has its street festival. This festival attracts visitors from outside our community. These promotions will build attention (and word of mouth) from those who live in Mainland, as well as nearby towns.

PART 4: THE FINANCIALS

EXPECTED REVENUE

We believe that we can average 100 customers per day, with approximately 65 at the lunch hour and 35 at dinner.

We believe that the average lunch bill will be approximately \$8.50 per customer, and that the average dinner bill will be approximately \$17.50 per customer.

This will provide our restaurant with revenues of approximately \$550 at lunch and \$600 at dinner for total average daily revenue of \$1,150.

Although The Vault Grill will experience different traffic and therefore revenues for each day of the week, this will lead to yearly food revenues of approximately \$345,000.

Additionally, we believe we will average 50 customers a day at the bar, Monday through Thursday, with an average bar bill of approximately \$4 per person.

On Fridays and Saturdays, we expect more bar customers who will also stay longer at the bar. Therefore, we expect about 100 bar customers a day on Fridays with an average bar bill of approximately \$10 per person, and 75 bar customers a day on Saturdays with an average bar bill of approximately \$10 per person.

We anticipate bar revenues of approximately \$122,400.

Total bar and food revenue is anticipated to be approximately \$467,400 per year.

We plan to be closed on Sundays, Christmas, New Years, and Thanksgiving.

COST OF DOING BUSINESS

Expenses	Expected Monthly Cost	Expected Yearly Cost
Rent	1,500	18,000
Salaries and Wages	10,000	120,000
Supplies	500	6,000
Advertising and Other Promotions	250	3,000
Utilities: Heat, Electricity, etc.	800	9,600
Utilities: Telephone and Internet	100	1,200
Insurance	1,650	7800
Total	14,800	165,600

STARTUP COSTS

We anticipate needing \$200,000 for building renovation, \$35,000 for decorations, furnishings, and equipment and supplies for the kitchen and bar, and \$8,000 for initial stocking costs bringing our startup costs to total \$243,000.

FINANCING

The three managers will each put a total of \$25,000 into the startup of this business. The remaining \$168,000 is the amount that we are requesting for bank financing.
